

Mohamad Razeen Iqbal bin Roslan

Data Engineer / Data Scientist / AI Solutions Engineer

Kuala Lumpur, MY | (+60)13-7441727 | [LinkedIn](#) | [GitHub](#) | razeeniqbal98@gmail.com

PROFESSIONAL SUMMARY

High-impact AI Solutions Engineer specialized in architecting end-to-end data systems and "builder-centric" AI applications. Master of Science in Artificial Intelligence with a proven track record of transitioning traditional engineering workflows into high-performance, automated AI environments. Expert in RAG pipeline development, LLM fine-tuning, and enterprise data governance, with a strategic focus on bridging the gap between technical complexity and business value.

WORK EXPERIENCES

Data Engineer

Contract, AEM Energy Solutions Sdn Bhd

June 2025 – Present

- **Spearheading end-to-end AI SaaS infrastructure development** after identifying a gap in personalized AI tools for enterprise users. Engineered and **integrated** a proprietary LLM framework by curating custom corpus dictionaries for pre-training and architecting high-performance APIs **to support seamless AI assistant functionality across personal SaaS platforms**. This transformation enables seamless, secure user access to internal AI models while maintaining complete control over the data lifecycle.
- **Architected and launched a comprehensive Data Quality Platform from scratch**, addressing a systemic lack of data governance that previously blocked advanced analytics. Led the entire lifecycle from initial database design and software architecture to a production-ready POC. This platform now serves as the enterprise standard, ensuring data accuracy and traceability across all upstream and downstream petroleum projects.
- **Developed an automated dataset labeling pipeline to resolve manual bottlenecks** in ML model retraining. Utilized **Ollama** to correctly label unstructured data before deploying refined models into **AzureML** for classification tasks. This initiative significantly improved model precision and reduced the time required for data-to-insight workflows.
- **Pioneered a "Builder" approach to unstructured data classification**, specifically targeting the challenge of extracting intelligence from complex PDF engineering drawings. Engineered a pipeline to convert these drawings into high-dimensional vectors, enabling a semantic classification model that identifies technical specs faster than manual engineering review.
- **Redesigned the Enterprise Insight Journey** by deploying high-fidelity Power BI and Python visualization frameworks. Moved beyond simple reporting to create goal-oriented dashboards that surface systemic asset performance issues, informing technical strategy and increasing decision-making accuracy by 30%.
- **Authored and implemented the organization's first AI Cybersecurity Procedure** to mitigate risks associated with Large Language Model (LLM) adoption. Designed these protocols to serve as the general office standard, balancing high-speed innovation with rigorous data privacy and ethical AI boundaries.
- **Directed a critical infrastructure migration from structured SQL to NoSQL environments** to support the scalability needs of real-time AI inference. This transition ensured optimal performance for high-growth data applications while maintaining 100% data consistency across distributed systems.

Data Analyst

Contract, EISmartwork Sdn Bhd

May 2024 – May 2025

- **Drove a 20% improvement in operational efficiency** by diagnosing user journey bottlenecks and developing predictive ML models on datasets exceeding 10M records. Implemented a strategic optimization framework that established a repeatable methodology for data-driven decisions.

- **Engineered high-performance ELT pipelines** to ensure timely and accurate data availability for enterprise reporting. Optimized database query times by 40%, ensuring the low-latency infrastructure required for real-time analytics and future AI assistant deployments.
- **Automated repetitive data transformation workflows** using custom Python scripts, eliminating 30+ hours of manual effort per month. This initiative allowed the team to shift from manual data cleaning to high-value strategic analysis.
- **Transformed organizational data literacy** by providing technical guidance to non-technical stakeholders and designing 5+ interactive dashboards. This reduced report generation time by 50% and empowered teams to make independent, data-driven decisions.

Engineer

Permanent, G&P Geotechnic Sdn Bhd Aug. 2022 – May 2024

- **Identified and resolved critical automation gaps** within traditional geotechnical engineering workflows. Self-taught Python and VBA to implement automated workflows that reduced manual engineering effort by 30%, catalyzing a department-wide shift toward data-centric roles.
- **Performed high-accuracy data analysis and visualization** using Excel and Grapher, delivering actionable insights that drove the successful completion of multiple high-impact infrastructure projects.
- **Redesigned the engineering reporting process** by implementing end-to-end data analysis workflows, from preprocessing to visualization, ensuring comprehensive data-driven recommendations reached senior decision-makers.

EDUCATION

Master of Science in Artificial Intelligence		
<i>Graduated (CGPA: 3.76), Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA)</i>		Sep. 2024 – Oct. 2025
Certified Data Analyst Associate		
<i>Complete with Certificates, Asia Pacific University of Technology & Innovation (APU)</i>		May 2023 – Aug. 2023
Bachelor of Civil Engineering with Honours		
<i>Graduated with Second Upper Class (CGPA: 3.65), Universiti Putra Malaysia (UPM)</i>		Sep. 2017 – Oct. 2021

CERTIFICATIONS

Axiata: Axiata Digital Leadership Programme

Apache: Data Streaming Engineer Foundations, Data Streaming Engineer - Apache Flink

Claude: Claude 101, Claude Code in Action

Microsoft Azure: AI-102, AI-900, DP-700, AZ-900, SC-900

Microsoft Power BI Data Analyst Associate (PL-300)

Google Cloud: Generative AI Leaders, BigQuery ML, Vertex AI

ACHIEVEMENTS

Top 20 Nominee for Cursor x Anthropic Hackathon	2025
Cursor Anthropic	
Champion for Innovation Challenge on Bootcamp 3	2025
<i>Axiata Digital Leadership Programme</i>	
Google Speaker for AI Build 2025 regarding BigQuery ML and Vertex AI	2025
<i>Google Developer Group UPM</i>	
Top 20 on AWS National 2025 for Training Large Language Model using AWS AI Sagemaker	2025
<i>AWS Singapore</i>	

TECHNICAL SKILLS

AI/ML & Generative AI: RAG Pipelines, LLM Fine-tuning (Ollama), Vector Databases (Semantic Search), Prompt Engineering, AzureML, Vertex AI.

Data & Pipeline Engineering: ETL/ELT, SQL/NoSQL (Migration), Data Governance, API Development (FastAPI/Flask).

Cloud & MLOps: Azure (AI-900), AWS (SageMaker), GCP, Containerization (Docker), API Integration.

Languages & Analytics: Python, SQL, Power BI (PL-300), Pandas, Matplotlib.
