PROFILE

AI Data Engineer with a background spanning Civil Engineering, Data Analytics, Data Engineering, and applied AI systems.

Experience includes data migration, analytics, automation, data-quality workflows, agentic AI, business intelligence, and application-oriented AI integration across energy and technology environments.

Also experienced in technical training and knowledge sharing across Data, Cloud, and AI topics.

EXPERIENCE

AI Data Engineer · AEM Energy Solutions Sdn Bhd

JUN 2025 - PRESENT

CONTRACT · HYBRID · KUALA LUMPUR

- Data migration workflows in Python, including API-based migration into NoSQL targets
- Excel and VBA automation for recurring data preparation
- Data-quality assessment and remediation workflows
- Agentic AI workflows with n8n and Ollama Cloud, shaped into structured application output

Assistant Fullstack AI Engineer · IntelliLabs AI

CONTRACT

PARALLEL CONTRACT, ALONGSIDE THE CURRENT ROLE

- Frontend and backend implementation of AI-enabled web applications
- AI feature integration
- Application delivery and deployment

Data Analyst · EISmartwork Sdn Bhd

MAY 2024 - MAY 2025

CONTRACT · ONSITE · KUALA LUMPUR

- Power BI dashboard development and maintenance
- Data transformation and preparation with MSSQL
- Reporting on datasets containing millions of records

Geotechnical Engineer · G&P Professional / G&P Geotechnic Sdn Bhd

AUG 2022 - APR 2024

PERMANENT · ONSITE · KUALA LUMPUR

- Geotechnical engineering calculations, technical reporting and field activities
- Analysis of large time-series datasets from engineering equipment, including abnormal readings and historical patterns
- Data visualization and future-reading prediction where applicable
- Automation of engineering and data workflows with Python, Excel and VBA

BIM Engineer · 3Dtech Solutions Sdn. Bhd.

FEB 2022 - AUG 2022

- Converted 2D construction drawings into coordinated 3D BIM models.
- Reviewed and coordinated models to identify conflicts between building elements.
- Checked coordination issues before construction.
- Conducted site inspections comparing actual construction conditions with the BIM model.

Project Engineer · Zafa Bina Sdn Bhd & PTT Construction Sdn Bhd

AUG 2020 - JAN 2022

- Site and worker coordination
- Construction drawing review and site planning
- Measurement and calculation checking
- Construction monitoring against the intended design

SELECTED PROFESSIONAL WORK

UDPs Migration · PETRONAS · Data migration · ~700K records

Developed a Python-based migration workflow to move approximately 700,000 records from an MSSQL source into a NoSQL target through an existing API.

Wellsight Toolstring Recommendation · AEM product · Agentic AI · ~200K records

Built a proof of concept for an agentic workflow that recommends suitable toolstrings based on available data and the activity being performed.

EDUCATION

Master of Science, Artificial Intelligence

Universiti Malaysia Pahang AI-Sultan Abdullah

SEP 2024 - OCT 2025 · CGPA 3.76

Bachelor (Hons), Civil Engineering

Universiti Putra Malaysia

SEP 2017 - OCT 2021 · CGPA 3.65

TRAINING & SPEAKING

Cloud Essentials untuk SUK Perak

Trainer · SUK Perak

5 TO 6 AUG 2026

Google AI Build 2025

Speaker / Technical Sharing · Universiti Putra Malaysia
2025

AEM Internal Technical Training

Internal Technical Trainer / Knowledge Sharing · AEM Energy Solutions Sdn Bhd

CERTIFICATIONS

Power BI Data Analyst Associate
Microsoft · 2023

Azure AI Engineer Associate
Microsoft

Fabric Data Engineer Associate
Microsoft

Generative AI Leader
Google Cloud

Azure AI Fundamentals
Microsoft · 2024

All 54 credentials on the portfolio →

TECHNICAL SKILLS

Data Systems

SQL, Python, ETL / ELT, Data Modelling, Data Platforms, Power BI, Data Governance, NoSQL

AI Systems

Machine Learning, NLP, LLM Applications, RAG, Agentic Workflows, LLM Fine-tuning, Vector Databases, Prompt Engineering

Product Engineering

React, TypeScript, APIs, Databases, Deployment, FastAPI / Flask

Cloud & Platform

Azure, GCP, AWS, Docker, CI/CD, AzureML, Vertex AI, SageMaker

Languages

Malay (Native), English (Professional), Arabic (Educational)

QualityPlus · AEM Energy Solutions · Data quality + agentic AI
Built a proof of concept that combines structured data-quality assessment with an agentic AI workflow. Demonstrated at the SPE AI Summit.

PETRONAS Data Migration & Excel Automation · PETRONAS · Data migration + automation
Supported PETRONAS data migration workflows through structured Excel templates and VBA automation.

PCMS · PETRONAS · Dashboards · Millions of records
Worked on Power BI dashboards used to monitor PETRONAS resources, with MSSQL supporting the underlying data.

IRMS · PETRONAS · Systems operations
Worked closer to the system and operational side of an existing PETRONAS resource-management environment.

SELECTED PROJECTS

VSB (Volleyball SDN BHD) 2026 · ACTIVE
A Malaysian social-volleyball platform where organizers create sessions and players discover games, see who is playing, book places and take part in a community.
REACT · TYPESCRIPT · VITE · TAILWIND CSS · vsb.madebyrazeen.com

FORMA 2026 · ACTIVE
A visual data workbench that makes the path from messy input to a reliable pipeline easier to see, work with and reproduce, while keeping engineering control.
TYPESCRIPT · REACT · REACT FLOW · PYTHON (PANDAS) · github.com/razeeniqbal/forma

Sepang Vision Lab 2026 · IN DEVELOPMENT
Race-intelligence lab for Sepang International Circuit: circuit geometry, simulated telemetry, replay, weather scenarios and Monte Carlo strategy.
REACT · TYPESCRIPT · REACT THREE FIBER · VITE · github.com/razeeniqbal/sepangvisionlab
